Specification In Vitro BiTech Container

*Specific
Lab Disposables*

Dimensions (mm)	
Box 9.15.6 	Lid 9.15.2
Container & Lid total height 	Tray
Specifications Material	
Container	Polypropylene without any additives
Lid	Polypropylene without any additives
Tray	Polystyrene
Features	
Injection moulded parts → Very stable and constant geometry and closure accuracy	
Closure patented by Technoplast BV	
Container and Lid manufactured in a Cleanroom Environment	
Compared with other containers very high resistance against contamination	
Compared with cylindrical containers 75% more usable surface area	
Containers stackable due to stack ridges	
Possibilities for client specific versions → packaging, closures, dimensions	
Easy open and closing	
Optimal and constant gas exchange	
Lid designed with flaps for resistance to contamination
