

# what on earth can we do for you?

Being a preferred supplier with full production facilities on 3 continents, **Rompa** has many years of experience in close cooperation with globally operating OEM's.

We are a full service supplier of plastic products, which means that the total project can be entrusted to us: from early concept to volume manufacture; Rompa produce the highest quality products at competitive prices with logistics solutions worldwide. Our highly skilled and trained employees are working to the highest standards and are supported by experienced teams of designers and engineers.

Our core business:

**Thermoforming, injection moulding, assembling plastic and/or composite products.** Additional services: printing, finishing or decoration to your specification. Having the unique combination of both thermoforming and injection moulding techniques under one roof, can lead to surprising opportunities and product combinations.

We are specialists in servicing the **medical, consumer electronics, technical, POS-packaging and accessory markets.**

In short: products which have to meet high standards in quality or identity packaging at point of sale.

Originally founded in WEU, the Rompa group has grown and has subsidiary companies in the **Czech Republic, the United States of America, China (Guangdong), Hong Kong, and the Netherlands.**

All locations are certified according **ISO 9001 and ISO 14001**. In addition we have the **ISO TS 16949 (automotive)** in the Czech Republic and in China, and **ISO 13485 (medical)** accreditation in the Netherlands, where we are also able to produce according the **food standard BRC/loP**.

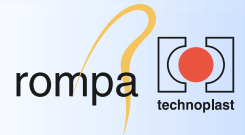

But our responsibility goes beyond this: the company remains up to date with new developments; we have an active task-force focussing on environmental issues, (new) materials and techniques, C<sub>2</sub>C, new technical developments and changes in the markets and our branches.

Some of our well-known multinational customers are Philips, Gillette (P&G), Avery Dennison, Microsoft, Johnson&Johnson, Inverness Medical, Bosch, Siemens, Moduslink, Merck, Panasonic, Parker Pen and Tyco Electronics.

Rompa has been working for many of these prominent companies for a significant number of years. They use us for our knowledge and experience, our advanced production technology and our global presence as well as our creative and inspired staff who are dedicated to providing the best possible product.

We would be pleased to give a more detailed presentation of our company A little of your time could be a big opportunity for your business.
